Transfer of NY MLC Capacitor Production

7/27/2019

Update to 8/15/2018 announcement

To Whom it May Concern

Starting in 2018, ATC NY which is a 40-year-old facility, began some of its MLCC manufacturing at the AVX Corporate Headquarters facility located in Fountain Inn, SC.

The Fountain Inn facility is 450k square feet, much of which has been built or upgraded with tens of millions of dollars invested over the past 5 years. It is a state of the art electronics manufacturing facility with high end clean rooms (10x improvement over NY) and processes. This rapidly growing facility has 650 people housing Corporate Operations, R&D, Sales, Marketing, Manufacturing, and North American Distribution Center. Fountain Inn qualifications include ISO 9001, ISO 14001, IATF 16949, and MIL-STD-790.

Product qualifications will be conducted concurrent with the relocation.

Existing equipment, processes, and material preparation through the firing process will transfer along with some new and upgraded equipment. Capacitor finishing and testing will remain at the current manufacturing location in Juarez, Mexico.

The 100 series capacitors are currently being manufactured in Fountain Inn. The 800, 700, 200, and 900 series capacitor manufacturing will ramp up during 2019 and the first half of 2020.

Customers may place last time buy orders of product manufactured in NY prior to the dates shown below by contacting ATC Sales. After that date, ATC cannot assure that additional orders will be manufactured in NY.

SERIES	DATE
100	9/30/2019
800	10/31/2019
700	12/30/2019
200/900	3/31/2020
