

# **JST** CORPORATION

**DATE:** March 30, 2022  
**TO:** JST SALES TEAM  
**FROM:** JST OPERATIONS DEPT  
**SUBJECT:** LIST OF SYM/SYF SERIES PART NUMBER VARIATIONS ASSOICATED WITH ADDITIONAL MATERIAL

---

JST factory has added a new phosphor bronze material to the existing phosphor bronze material (NF-202) for the SYM and SYF series.

The suffix (KO) stands for the additional phosphor bronze material (KLF-5). The performance and quality of KLF-5 is equivalent to NF-202.

The prefix (D) stands for the manufacturing location in Malaysia.

Customer could receive any of these part number variations from JST. The prefix and suffix received will depend on the factory and phosphor bronze material used in the manufacturing process, but will have no impact on fit, form or function of the part. The JST part numbers being promoted for this series can be the base part numbers without any prefix or suffix, as it is listed in the JST datasheet.

Please refer the APPENDIX A for the list of the part number variations.

Thank you,

---
